

FILTER SPECIALISTS, INC.
Innovative Solutions. Clear Results.

April 13, 2009

All Vorex and Vorex HP cartridges are manufactured from 100% polypropylene, thermally bonded fibers. There are no additives, lubricants or surface-active agents used in the construction of the FSI Vorex filter cartridges.

Vorex and Vorex HP are in compliance with the appropriate guidelines outlined by the U. S. Food and Drug Administration. Construction components meet the FDA requirements outlined in the Code of Federal Regulations, Title 21, Sections 177.1520 (a), (1) and Section 177.1520 (c), (1.1).

Guidance in the proper use of polymers is set forth by appropriate government regulation and must be determined by the end user. End users are encouraged to consult the Code of Federal Regulations in determining acceptable uses for polypropylene homopolymers Ref...Title 21, Section 176.170.
